

The 30-Day In-House AI Team Install

Founder's Cohort — Week-by-Week Delivery Plan

THE PROMISE

"In 30 days, we'll install your AI executive assistant, connect it to your CRM brain, send a database reactivation blast, launch an AI-built ad campaign, and write a full nurture sequence for it — so you stop wasting leads and start booking more appointments."

AVATAR — MUST MEET ALL

- Uses **Follow Up Boss** or **Lofty**
- **≥ 10–15 deals** in the last 12 months
- **≥ 500 contacts** in CRM
- Wants AI to tell them **who to follow up with** and help run ads

FORMAT & PRICE

- **4 weekly group implementation sessions** (60–75 min)
- **Weekly office hours** (60 min)
- **Skool community** support
- **Price: \$2,997 USD, one time** — 10 seats, hard cap (Founder's Cohort)
- Container word **"Sprint"** = bundled, non-commoditized system

The 4 Activation Events (Non-Negotiable Outcomes)

Every week is designed to drive at least one of these. If a client hits all four, they've won — and they know it.

#	Activation Event	Definition of Done
1	AI EA installed and used	≥ 3 prompts run
2	Database reactivation blast sent	To ≥ X contacts (you set X)
3	AI ad campaign launched	1 live campaign
4	Full nurture sequence drafted	8–12 touches

The Sprint at a Glance

Week	Focus	Outcome
Week 0	Onboarding & Expectations	Client oriented, intake done, pre-committed to the 4 activations
Week 1	EA Setup (Claude Only)	AI EA installed with 3–5 usable prompts; immediate time savings
Week 2	CRM Brain + DB Reactivation	MCP connected to FUB/Lofty; 1 DR blast sent
Week 3	AI Ad Campaign Launch	1 AI-built ad campaign live
Week 4	Nurture Sequence + Future Path	8–12-touch sequence drafted; upsell decision set up

WEEK 0

Onboarding & Expectations

Objective: Get them oriented, reduce overwhelm, and pre-commit to the 4 activations so they feel taken care of before the first call. Perception of progress is value.

CLIENT-FACING

Welcome Email

- Clear promise and 4 outcomes listed
- Dates/times for all 4 sessions
- Link to Skool + office hours schedule

Intake form (5–10 minutes)

- CRM (FUB/Lofty) + login details
- Deal volume last 12 months
- Database size, current lead sources

Two Looms

- “How the Sprint works & what to expect”
- “How to join Zoom and follow along”

INTERNAL (TEAM)

- **Azul:** confirms CRM access and tags each client in the master sheet (FUB / Lofty, DB size, deal count)
- **Rebecca:** checks all clients are in the calendar for Weeks 1–4

MAKE WEEK 0 FEEL WORTH IT

Language for calls/emails:

“Most programs dump content on you. We're going to walk you through 4 big installs, one per week. Your only job right now is show up. We'll do the heavy lifting.”

“By looking at your CRM and intake now, we're customizing this Sprint around your numbers, not theory.”

Frame this as **personalized onboarding, not admin**. Custom beats generic.

WEEK 1

EA Setup (Claude Only)

Objective: AI EA installed with 3–5 usable prompts. Build confidence and show immediate time savings.

WHAT WE INSTALL

Claude AI EA with:

- Brand-voice prompt applied
- Saved “skills” for: **listing description** · **follow-up email for new lead** · **social post / script**

CALL FLOW (GROUP)

- Quick intro + restate 4 Sprint outcomes
- Walk through Claude account + EA setup using SOP — everyone clicks along
- Live demo of 3–5 “everyday” prompts; have them run them in real time
- **Homework:** run 3 prompts this week and post best output in Skool

INTERNAL LOGISTICS

- **Rebecca** hosts; **Emma/Ryan** sell the future (“this is the brain we'll plug into your CRM next”)
- **Azul/Frederick** on support: monitor chat for “I'm stuck” and drop timestamped Looms afterwards

MAKE WEEK 1 FEEL WORTH EVERY PENNY

“If all you got from this Sprint was a personal EA that can knock out your listing copy, follow-up emails, and social posts on command, it would be worth the whole thing. Everything else is stacking on top.”

Call out individual wins by name — reinforces perceived value and engagement.

WEEK 2**CRM Brain + DB Reactivation**

Objective: Connect MCP to FUB/Lofty, show the “hottest leads” view, and send one DR blast.

WHAT WE INSTALL**MCP connection + HTML dashboard**

- Pull leads/contacts from FUB/Lofty
- Query “hottest X leads” (based on last activity, tags, etc.)

DR campaign

- Proven email template loaded and sent/scheduled to a defined cohort (e.g. 200–2,000 contacts)

CALL FLOW (GROUP)

- Recap Week 1 + wins
- Live walk-through: connecting the MCP dashboard to FUB/Lofty
- Show them how to ask Claude: “Show me my hottest 50 leads this week”
- Segment the database for the DR campaign: past clients or “old leads” segment
- Paste the DR email and schedule/send together

INTERNAL LOGISTICS

- Azul preps a quick-start doc for common FUB/Lofty pitfalls
- Frederick ready with backup for any “my CRM looks different” issues

MAKE WEEK 2 FEEL WORTH EVERY PENNY

“This one email has generated [insert real past result] for clients just like you. Even if you never touched ads or nurture, getting one extra deal from this blast pays for this Sprint.”

Celebrate sends in chat: screenshots of “campaign scheduled” etc. People value what they see others doing.

WEEK 3

AI Ad Campaign Launch

Objective: Have one AI-built ad campaign live (listing, giveaway, or hot sheet).

WHAT WE INSTALL

In the **AI Ads tool** (or manually if needed) — 1 campaign built with:

- Hook and offer (3 templates to choose from)
- AI-generated copy
- AI-assisted creative
- Targeting set
- Linked to CRM form / lead source

CALL FLOW (GROUP)

- Recap DR results / replies
- Each client chooses a path: **Listing** · **Giveaway** · **Hot sheet**
- Build one campaign live as they follow step-by-step
- Everyone turns their campaign on (or queues it for review with a clear deadline)

INTERNAL LOGISTICS

- **Frederick** owns the “ad build SOP” and screenshares; **Azul** handles “stuck” DMs
- Keep Q&A focused on **using the tool**, not marketing theory

MAKE WEEK 3 FEEL WORTH EVERY PENNY

“If all this did was give you a repeatable, AI-built listing / buyer campaign you could use for every property this year, would it be worth \$2,997? For most agents, that’s 1 deal.”

Show how they can **clone this campaign** for future listings in 3–5 clicks.

WEEK 4**Nurture Sequence Build + Future Path**

Objective: Write a full nurture sequence and set up the decision for upsells.

WHAT WE INSTALL

Using the **nurture AI tool**:

- 8–12-touch sequence for the new ad campaign leads, and/or DR repliers who aren't ready yet
- Output saved to shared doc / template

CALL FLOW (GROUP)

- Recap: list the 3 live systems they now have (EA, CRM brain + DR, ads)
- Walk through the nurture tool with 1 example; then have them generate their own sequence
- Quick live edits on 2–3 volunteers' sequences
- Explain: how to paste these into FUB/Lofty themselves, **or** present the AI Conversion Pack + Nurture Install upsell (saved for second doc)

INTERNAL LOGISTICS

- Team collects all sequences in a folder; best examples become future templates
- Tag who looks like a fit for **Conversion Pack** vs **Nurture Install only**

MAKE WEEK 4 FEEL WORTH EVERY PENNY

"In the last 30 days, you've built systems most teams never get to in 3 years: an EA, a CRM brain, a DR machine, a live ad, and a full nurture engine. If you never did another thing with us, you'd be ahead of 95% of your market."

Social proof: highlight 1–2 people who already booked calls from DR / ads.

Team roles across the Sprint: Rebecca — hosting + calendar · Emma/Ryan — vision + selling the future · Azul — CRM access, master sheet, support DMs · Frederick — ad build SOP, technical backup.
