

FOUNDATIONAL DOCUMENT — MARKETING & SALES

Your In-House AI Team

The 30-Day In-House AI Team Install
Positioning, messaging & language — the source of truth.

One team, one story — every asset speaks the same language.

VERSION 1 · JULY 2026

READ THIS FIRST

What This Document Is

Our shared reference for how we talk about the 30-Day In-House AI Team Install.

The goal is simple: every ad, email, slide, page, script, and DM tells the same story in the same language, so nothing we ship contradicts anything else. If you're writing customer-facing copy, start here. And as our positioning evolves, we update this document first so everyone stays in sync.

What's Inside

#	SECTION	WHAT IT LOCKS
1	The Offer at a Glance	Name, price, format, guarantees, scarcity, ascension ladder
2	Who We're Talking To	The avatar, their fears and pains, and their exact words
3	The Core Narrative	Before → Bridge → After → Truth. The VSL and webinar arc
4	The Mechanism	The three AI employees: titles, job descriptions, payroll anchor
5	The Proof Map	Which proof supports which claim, and how to use it honestly
6	Congruence Rules	Say this / never this, and the per-asset checklist

Companion documents: Doc 1 — Internal Delivery Brief (how we deliver) · Doc 2 — Upsell & Ascension Plan (how we ascend) · Doc 3 — Launch Execution Plan (who does what). This document governs what we SAY.

SECTION 1

The Offer at a Glance

One table. If a detail isn't here yet, flag it so we can add it — better than improvising.

ELEMENT	LOCKED VALUE
Program name	The 30-Day In-House AI Team Install ("Sprint" = internal/cohort word only)
Mechanism name	Your In-House AI Team
One-liner	Stop being the assistant in your own business.
The promise	In 30 days, we install your In-House AI Team — an AI Executive Assistant, an AI Sales Manager, and an AI Ads Manager — so you stop being the assistant in your own business and start closing more deals.
Price	\$2,997 USD one-time · Founder's Cohort rate · no long-term commitment
Format	4 weekly live group implementation sessions (60–75 min) + weekly office hours + private Skool community
Who qualifies	Follow Up Boss or Lofty · 10–15+ deals in last 12 months · 500+ contacts · wants AI to help, not replace
Scarcity	10 seats, hard cap — implementation-focused and hands-on
Guarantee 1	Week 1: if you don't think it's worth every penny, we refund you.
Guarantee 2	Attend 3 of the 4 weeks and complete the simple homework — if all systems aren't installed, our team works with you 1:1 until they are.
Traffic source	Warm only: webinar attendees + email list. The webinar pre-frames everything; assets confirm, never introduce.
Ascension	DIY (free) → main upsell: AI Conversion Pack (\$2,000, 60-day beta, 3–5 accepted) → downsell: Nurture Install (\$500). Seeded Week 3, closed Week 4 — never mentioned Weeks 1–2.

SECTION 2

Who We're Talking To

A \$150k+ agent who is great at real estate and drowning in their own business.

THE AVATAR

- Uses **Follow Up Boss or Lofty** as their main CRM
- Closed **10–15+ deals** in the last 12 months — they're good at this job
- Has **500+ contacts** sitting in their database, mostly untouched
- Skeptical of gurus, burned by lead vendors and agencies
- Wants AI to **work for them** — not replace them, not another course

THEIR FEARS & PAINS (IN PRIORITY ORDER)

- **Decision fatigue:** they don't know what to do first each day, so they do nothing strategic
- **Buried money:** they know deals are dying in their database from forgotten follow-up
- **Left behind:** other agents are figuring out AI and they're falling behind
- **Time poverty:** 9pm emails in the car, Sunday mornings catching up, no real day off
- **Stuck:** they know top teams win with staff + systems, but can't afford or manage staff

THEIR EXACT WORDS — USE THESE VERBATIM

"I feel like my business should just be more organized. I need to know what I need to do every day. I just need more systems."

"I honestly think the bottleneck has been time, as well as not knowing how they've been contacted via my Lofty procedures... it's been busy, especially when it's just me." — Lofty client, record Q1

They can't articulate the dream — they say "systems" and mean "certainty." When we name it precisely for them, they conclude we have the answer. That's the job of every headline.

SECTION 3

The Core Narrative

The emotional arc of everything: VSL, webinar open, sales page, enrollment calls.

1 · THE BEFORE (THE STUCK)

*“You already know why top agents and teams grow: they have systems and they have staff. But you’ve never hired or trained staff, and you don’t have the money to gamble on it right now — so you feel stuck. That’s why you’re answering emails in your car at 9pm. That’s why you wake up early on Sunday to catch up, just to protect a few hours with your family. That’s why you open Follow Up Boss, see 2,000 contacts, feel the overwhelm hit, and close the tab. And you know — you **know** — you’re already losing deals because of it. Honestly? It feels like hell.”*

2 · THE BRIDGE (THE MECHANISM)

“So here’s what we do: we give you access to what top teams already have — for a fraction of the cost. We install your In-House AI Team in 30 days. One-time fee, no long-term commitment.”

3 · THE AFTER (THE MONDAY)

“You wake up Monday at 8am and you know exactly who you’re talking to today and what you’re going to say. Some of your leads were already followed up with on your behalf overnight. Your listing copy is already written. Your entire job today is one thing: make money.”

Note: on enrollment calls, say “go on appointments” instead of “make money” — money is the outcome, appointments are the believable step.

4 · THE TRUTH (THE REFRAME)

*“You think you want systems. You think you want leads. What you actually want is to feel organized in your day and to know your business can grow without breaking you. You’re down to do the work — you just don’t always know **what** work to do, and that’s what’s been overwhelming. That ends in 30 days.”*

THE CORE BELIEF — REPEAT IN EVERY ASSET, EVERY WEEK

“Leads don’t make you money. The quality and consistency of your follow-up does.”

Week 1 ties to it via time freed for follow-up · Week 2 via knowing who to follow up with · Week 3 via new leads that must be followed up · Week 4 via the conversations that convert.

SECTION 4

The Mechanism — Your In-House AI Team

Three employees, real job titles, one rule: the title never appears without its job description.

EMPLOYEE	JOB DESCRIPTION (ALWAYS SHOWN WITH THE TITLE)	WHEN
AI Executive Assistant	Takes the low-dollar-per-hour work off your plate: listing descriptions, buyer follow-up, and client follow-up tasks — written in your voice, on command.	Week 1 install
AI Sales Manager	Lives inside your Follow Up Boss or Lofty, telling you exactly who to call, what to say, and what to do — every single day.	Week 2 install
AI Ads Manager	Brings new leads in with AI-built ad campaigns, then follows up with every one of them — custom to what they signed up for, 24/7.	Weeks 3–4 install

THE INDEED TEST (WHY THESE NAMES)

Every employee name must be a job an agent could post on Indeed today. That's what makes “hiring a team” feel real and kills the “I'm bad at software” fear. Nobody is scared of hiring staff — they're scared of learning software.

AI reports to them; it doesn't replace them.

THE PAYROLL ANCHOR — USE IN EVERY SALES CONVERSATION

A human executive assistant costs ~\$50k/year. An ads manager, ~\$60k. An inside sales agent for follow-up, ~\$40k. That's \$150k/year of payroll — installed for \$2,997, one time.

Sales quotes the same numbers as the ads. No variations.

STANDING TAGLINES (SUPPORT COPY, NEVER THE NAME)

- “\$150k of staff without the payroll” — the money line
- “The in-house AI team that works while you sleep” — the always-on line
- “Stop being the assistant in your own business” — the identity line
- “You don't have a lead problem. You have a worked-lead problem.” — the reframe line

SECTION 5

The Proof Map

Every claim gets proof. Source: Notion Social Proof bank + Drive training wall.

CLAIM IT SUPPORTS	PROOF (NAMED, IN THE BANK)
AI Ads Manager — “leads flowing in”	Amir: 3 appointments in under a week · David Corona: \$121 ad spend → 2 listing appointments · Marc: 17 leads in 3 days · Jelani: 25 leads at \$5 CPL (\$1.125M listing) · Eric Palin: 146 new leads (giveaway) · \$1.2M buyer signed from ads · Angelo: listing closed from YouTube ads · Myles: first deal from SG ads
AI Sales Manager + nurture — “know who to follow up with”	Janelle: 15 replies from the database email campaign (DR blast proof) · Lisa Hall: nurture flipped 2 clients (1 listing + 1 buyer) · Katie: direct replies from the email script · James: stopped wasting time guessing which leads mattered · “Hidden \$6,000 deal found through tracking”
Trust in SalesGenius — “these people get agents results”	Nichole: 5 deals closed + 2 in escrow after Mastermind · 5 listing presentations in one week from SG funnels · Myles S.: \$350k → \$725k GCI · Myles: “I say ‘wow, that’s genius’ every time Emma or Ryan speaks”
Demand & delight — “agents love learning AI from us”	160–200 agents live per training (Zoom screenshots) · “Holy shit / WOW / Mind blowing / Solid gold” chat walls · “I’m in and paid!” live purchases · Charlotte Bittner + Eric Landry emails

THE HONEST FRAMING RULE

These results came from SalesGenius running the campaigns and systems. The Sprint installs the same systems with AI so the agent runs them. So the line is: **“These are the exact campaigns, emails, and nurture sequences we’re installing in your business.”** True, powerful, compliant. Never imply a past client used the AI team itself — cohort #1 creates that proof.

PROOF GAPS BEING CLOSED

- **Arslan:** 60–90 sec screen recording of the dashboard pulling “my hottest 50 leads” from a real FUB account — mechanism proof for the AI Sales Manager
- **Cohort #1:** becomes the outcome proof — “you’re the founding cohort, that’s why it’s \$2,997” turns the gap into the scarcity story
- **Azul:** keep sweeping Skool/email for time-saved quotes for the AI Executive Assistant

SECTION 6

Congruence Rules

One story everywhere. The webinar teaches it, every other asset confirms it.

ALWAYS SAY	NEVER SAY
Your In-House AI Team / The 30-Day In-House AI Team Install	“AI Sprint”, “EA Sprint”, “program”, “course”, “bootcamp”, “digital marketing system”
AI Executive Assistant · AI Sales Manager · AI Ads Manager (exact titles, with job description)	“CRM brain”, “Daily Deal Director”, “marketing team”, “the tool”, “the software”, “chatbot”
“We install it with you, live” / “installed in your business”	“You’ll learn how to...”, “course modules”, “training videos”, “DIY”
“\$150k of payroll for \$2,997, one time”	Any other price comparison, monthly framing, or invented numbers
“Know exactly what to do every single day”	“Get organized”, “work smarter”, generic productivity language
“You don’t have a lead problem, you have a worked-lead problem”	“Get more leads” as the headline promise
“Founding cohort — 10 seats, you’re the case studies”	Fake urgency, countdown timers on false deadlines, “spots almost gone” without truth

ASSET	WHAT MUST MATCH THIS DOC
Webinar / VSL	Full core narrative (Section 3) + teaches the 3-employee frame + payroll anchor + both guarantees + founder’s cohort story
Sales page (07-sprint)	Confirms the webinar — never introduces. Hero = identity line + 3 employees as checkmarks. Proof wall. Both guarantees. Apply CTA
Emails / SMS	One employee or one proof story per email. Core belief line in every sequence. Same titles verbatim
Ads / creative	Hook from the fears (Section 2), mechanism name, payroll anchor. No claims beyond the Proof Map
Enrollment call script (Ryan/Chris)	Before/After scenes conversationally · “go on appointments” not “make money” · payroll anchor · qualify: CRM, deals, database, funds
Skool / community	Same three employee titles when referencing systems. Celebrate wins in Proof Map language

THE ENEMY (POSITION AGAINST, NEVER BY NAME)

Lead vendors (“more leads into a leaky bucket”) and agencies (“you rent results — the day you stop paying, it all stops”). Our wedge: **this is installed in THEIR business, on THEIR CRM, and it's theirs forever.** Ownership vs. renting.

v1 — July 9, 2026. As our positioning evolves, we update this document first so every asset stays in sync.
